

Eat Well, Live Well.

AJINOMOTO TRADING, INC

Creating proprietary values-
Ajinomoto Trading is your global partner.

CORPORATE GUIDANCE

We create better lives globally by contributing to significant advances in Food and Health and by working for Life.

Ajinomoto Trading, Inc. was founded in 1954 as Shin-Nippon Commerce, Inc. for the purpose of exporting umami seasoning known as “AJI-NO-MOTO®” and other food products produced by our parent company, Ajinomoto Co., Inc. In the more than 60 years since, we have established ourselves as a core part of the trading business of the Ajinomoto Group by developing markets throughout southwestern Asia, exporting machinery and equipment to overseas plants, procuring raw materials overseas, importing products and materials into Japan and more as our parent company has extended its global reach.

In recent years, our business fields have expanded to include the handling of products such as foodstuff materials, food products, life support, healthcare, machinery for food processing factories, and packaging, as well as the procurement of ingredients, product development, and outsourcing of manufacturing and sales for our customers. In addition, we are leveraging our experience and expertise to expand BPO (Business Process Outsourcing) business in which we manage our customers importing and exporting, as well as their supply and demand. And the provision of unique services and products by our affiliates in Thailand and Canada has enabled us to respond to an even broader range of customer needs.

As a core company of the Ajinomoto Group, we intend to continue being a business partner providing quality work that our customers can trust.

We are sincerely grateful for your continued support.

Our Misson, Vision, Varue

【 Mission 】

Contribute to customers' business by trading

■ Quality Assurance

■ Safety Assurance Dept.

As the trading company of the Ajinomoto Group, we examine and manage manufacturers and suppliers to make sure they provide safe and secure products, which we then deliver to customers inside and outside the Group.

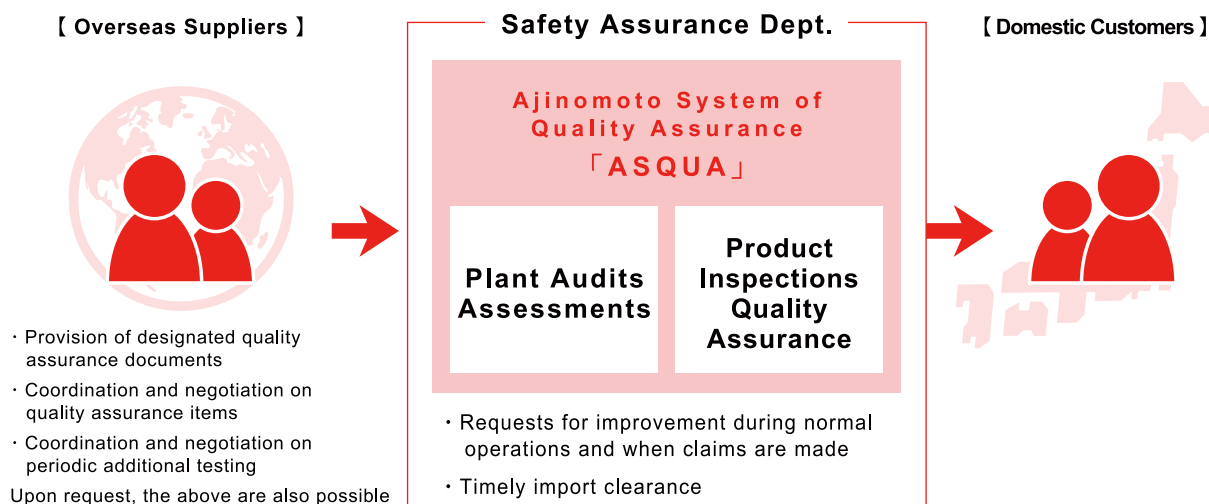

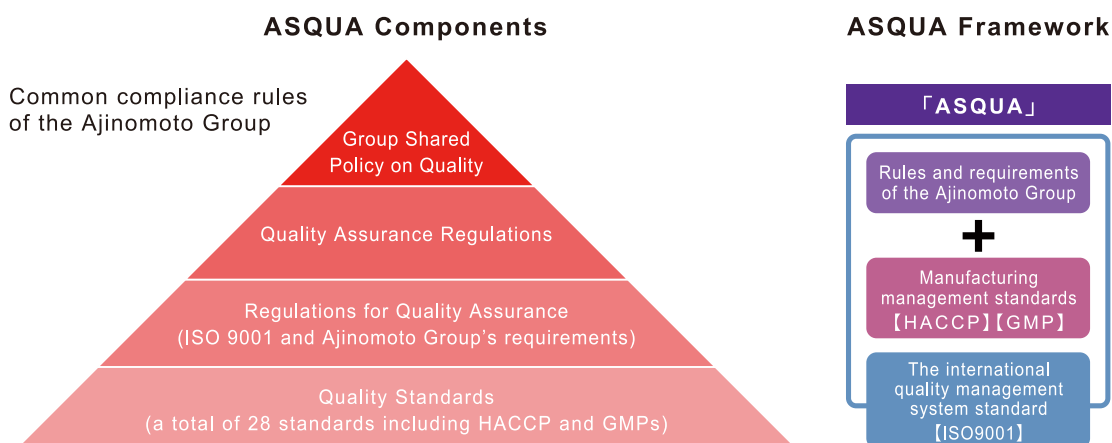

・ Ajinomoto Group Shared Policy on Quality

We contribute to a better life for all throughout the world by providing safe and high-quality products and services.

1. We pay full attention to the requests of our customers, and provide products and services meeting with their satisfaction.
2. We actively provide appropriate information to our customers and continue to improve our trustworthiness.
3. We make no compromises with regard to safety, conducting surveys and research as thoroughly as possible, faithfully complying with applicable laws and regulations, and always delivering products and services of uniform quality.
4. We ensure quality through the Ajinomoto System of Quality Assurance (ASQUA), based on the concepts outlined in international ISO standards.
5. Under the leadership of our management, each one of our company's employees makes the greatest effort to provide safe and high-quality products and services through work at all levels, from research and development to production, distribution, sales, and services.

・ Ajinomoto System of Quality Assurance (ASQUA)

As part of quality assurance, we have implemented and are operating ASQUA, the Ajinomoto Group's original QA system. The foundation of ASQUA consists of such manufacturing management tools as ISO 9001 (the international standard for quality management systems), HACCP (a food safety control approach), and various good manufacturing practices (GMPs) that ensure proper manufacturing. To complement these, ASQUA adds the Ajinomoto Group's own ideas and standards.

■ Quality Assurance

■ Field survey of food ingredients, etc.

To give an example, when we import food ingredients from overseas, we directly audit sanitation and product control at the product plant to determine if it meets set standards and is in compliance with applicable domestic laws and regulations. Subsequently, we present an improvement proposal, if we determine that improvements are needed at a production plant, and conduct confirmations until implementation is complete and perform another audit. To approve start of handling an ingredient internally, we make multiple confirmations in accordance with the Quality Assessment Standard that is fundamental to ASQUA, to ensure that no health consideration is overlooked. Finally, when any problems have been overcome, we get internal agreement to authorize handling of the ingredient. At this point production begins.

■ Why Choose Ajinomoto Trading?

【 Provide quality guarantee sheet to customers 】

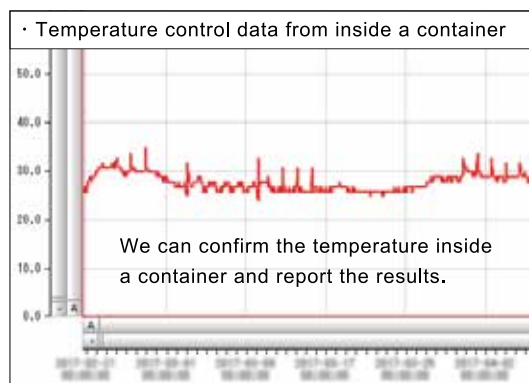

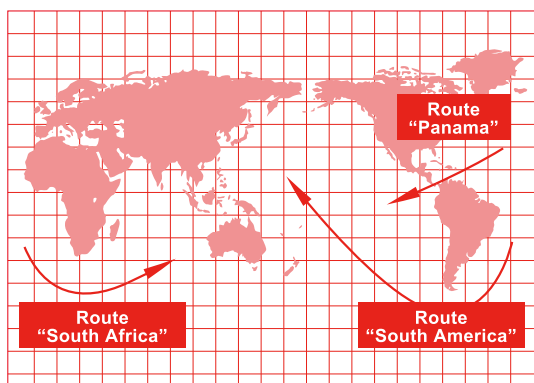

We are able to provide quality assurance certificates to customers for products imported from multiple countries. The content of the quality guarantee sheet that we provide to customers can be customized according to customer requests including coordination with local manufacturers and periodic additional product testing.

【 Transportation method proposals 】

We confirm the route from the local plant to the export port, as well as transshipment sites in the case of maritime transportation, and select appropriate means of transportation.

We pay particular attention to the route, number of days in transit, and other factors relating to cargo that requires temperature control. In cases where records of temperatures inside containers are necessary pursuant to customer requirements, we can install data loggers inside containers and report the results.

■ Proposal of professional trading functions based on AEO

What is the AEO (Authorized Economic Operator) program?

The AEO system is a system whereby trading companies with established cargo security management and compliance regimes are certified by Japan Customs.

Within international logistics, how to guarantee security and smooth out processes has become an international issue from the perspective of strengthening counter-terrorism measures. The World Customs Organization (WCO) has adopted the "AEO Guidelines," a collection of guidelines set forth for customs to certify trade-related businesses that have demonstrated excellent compliance, thereby making the simplification of customs clearance procedures more convenient.

The AEO system was introduced in an effort to strengthen Japan's international competitiveness. Ajinomoto Trading was approved as an "AEO Authorized Exporter" by Tokyo Customs in 2008.

We are able to propose to "AEO Authorized Exporters" a reduction in logistics costs and shortening of lead times through effectively utilizing mitigation and simplification measures in customs clearance based on a trusted in-house system certified by customs. Furthermore, we are able to propose reductions in customs duties within importing countries that fully utilize the economic / free trade partnership agreements (EPA, FTA) between various countries, as such agreements having been topics of discussion in recent times.

Benefits of an AEO Authorized Exporter certification

- An export permit may be granted for cargo held in factories and warehouses outside of customs areas
- Fewer document reviews and cargo inspections when making export declarations

■ Efforts to improve customer satisfaction

Utilizing the ISO 9001 quality management PDCA cycle, we continually carry out improvements and constantly work to improve product quality for customer satisfaction.

■ Food ingredients

■ Comprehensive business package to support food factories.

Both the percentage of food ingredients we source from around the world and the number of consignments we make to overseas factories for food processing are increasing. We are expected to not only pioneer superior materials, but further perform product-specific processing and select optimal raw materials, seasonings, and packaging materials to provide a safe and secure service. When ingredients and products need to be sent from Japan, the know-how concerning export procedures, including legal regulations, food inspections, quality assurance, etc. in each country is also important. Having been an import and export trading company of Ajinomoto products and food ingredients since our foundation, we utilize the Ajinomoto Group network both within Japan and overseas to ensure a safe and reliable service.

■ Export food products

【 Exporting Ajinomoto products 】

We export seasonings, soups, and Chinese-style stir-fry-sauces on consignment from Ajinomoto company, as well as cosmetic and toiletry ingredients and packaging materials, to Ajinomoto Group local companies.

【 Export non-Ajinomoto products 】

We sell Japanese-made food ingredients required in overseas food processing factories via our group company in Thailand. In particular, food ingredients ranging from Japanese-made seasonings (dashi, spices) to frozen products and processed food products have proved essential in local food processing factories. We work together with Thai group companies to actively sell raw food materials to our customers.

· Dashi base (soup stock) extract and powder

· Essential products used in Japanese cuisine, such as nori (Dried seaweed) and soy sauce

· Essential ingredients for noodles and broth

■ Food ingredients

■ Import food products

【Import seasoning and frozen food products】

We import a variety of food products manufactured using carefully selected raw materials, including garlic powder and other seasonings, processed meat products, and products under import quota (IQ) restrictions, such as squid and yellowtail fish.

· Powdered food products of pot herbs such as ginger and garlic

· Processed meat products

· Fishery IQ products: squid, yellowtail etc.
*IQ: under import quota

■ Why Choose Ajinomoto Trading, Inc.?

- We guarantee consistent quality in accordance with our own Ajinomoto System of Quality Assurance (ASQUA).
- We can offer a stable supply of safe and high-quality food ingredients through our own independent networks.
- In addition to simply supplying functional seasonings, we are further able to suggest usage methods which will lead to commercialization of such products.
- We employ a number of hygiene management sanitation supervisors for imported foods.

■ Amino acids & cosmetic ingredients

■ Supply of amino acids & cosmetic ingredients from Ajinomoto Co., Inc.

We determine transportation routes for pharmaceutical and cosmetic ingredients on consignment from Ajinomoto Co., Inc. upon confirmation of different hazards within the transportation environment, such as packaging, season, temperature, humidity, and transportation method/time. Our products are carefully delivered to ensure even greater product reliability, considering both import and export laws, regulations, and the needs of all our customers.

■ Main goods / Secondary materials handled

· Amino acids / Cosmetic ingredients

【 Export amino acids 】

- We accept consignments for the export of "amino acids" produced by Ajinomoto Co., Inc.

【 Export Amino Vital® 】

- We export twenty-seven types of the sports supplement "Amino Vital®" to Asia, Russia, and Brazil

【 Amino acids & cosmetic ingredients 】

- We export surfactants, functional ingredient, humectant, emollient, and gelling agents featuring amino acid technology. Used mainly in cosmetics, shampoo, etc.

· Secondary materials

【 Fumaric acid 】

- Industrial use: bath additives, sizing agents, etc.
- Food use: acidifiers, baking powder, etc.

【 Glycine 】

- Used in surfactants and food additives

【 Activated carbon 】

- Used in decolorizing and filtering agents

【 Soda ash 】

- Used widely in pH adjusters, fermentation additives, and food additives

【 L-aspartic acid 】

- Used mainly in the manufacturing of sweeteners and pharmaceuticals

■ Why Choose Ajinomoto Trading, Inc.?

- A stable supply of safe and high-quality raw materials is made possible by our own independent network.
- In addition to simply supplying amino acid materials, we further make suggestions based on the knowledge and insight of the Ajinomoto group.

The Ajinomoto Group network

- Basic research on amino acids
- Research and development of amino acids and raw materials for cosmetics
- Sale of amino acid cosmetics
- Manufacturing technology
- Quality assurance/management

■ Fish collagen

■ Fish collagen derived from Canadian marine fish

Manufactured from natural marine fish (cod) using their proprietary technology, Kenney & Ross fish collagen is widely used in beauty products, health products, and supplements. Founded in 1945, Kenney & Ross Limited became a wholly owned subsidiary through equity participation with Ajinomoto Trading, Inc in 2015. Kenney & Ross Limited is one of a small number of companies that produce only natural ocean fish as raw material. Further, their factory is both Halal and Kosher certified.

■ An introduction to fish collagen

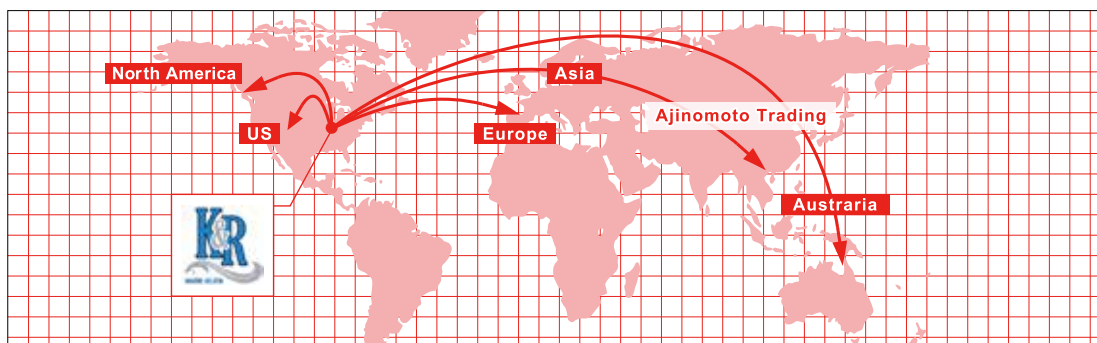

Fish collagen is manufactured from the skin of natural marine fish, such as cod. After the base product fish skin is hydrolyzed and broken down with enzymes, collagen peptides with small molecular weight are turned into a powder by spray drying.

The fish collagen produced by Kenney & Ross Limited has high water solubility, no smell or taste, and can be widely used in dietary supplements, cosmetics, or functional foods.

■ Why Choose Ajinomoto Trading, Inc.?

- A safe product, with both Halal and Kosher certification.
- Product quality assurance managed in compliance with the Ajinomoto Group policy.
- Sales are being expanded to Asia through utilization of the extensive Ajinomoto Group network in Japan and overseas.

■ Foodstuff manufacturing machinery and packaging materials

■ “Supporting expansion overseas” to facilitate globalization

Focusing on Ajinomoto Group overseas affiliates, we are responsible for establishing and expanding machinery used within factories, exporting and selling machinery/materials, and supporting production bases in over twenty countries. From maintenance in collaboration with manufacturers to procuring components that are difficult to obtain overseas, we support the sustainment and improvement of productivity. We encourage the globalization of our customers through applying our know-how to the fullest for seamless import clearance and distribution in each country.

■ Main equipment handled

【 Centrifuge 】

Separates moisture and solids using centrifugal force. Used for both food products and a wide range of other applications.

【 Packaging equipment 】

Used to package food products. An important component linked directly to factory productivity. We recommend reliable, Japanese-made machines due to the need for stable operation.

【 Amino acid analyzer 】

We provide analyzers to measure amino acid concentration.

【 Container bags 】

Produced overseas by Japanese manufacturers and sold through trilateral trade.

【 Other products 】

We export and sell Japanese-made integrated research equipment with superior functionality that cannot be obtained overseas. We deliver products and equipment from our catalog/website as specified by our customers.

■ Why Choose Ajinomoto Trading, Inc.?

- We have proprietary shipment and packaging technology developed over the past thirty years.
- We offer maintenance support making use of our diverse manufacturing network.
- We sell equipment accompanied by the dispatch of relevant engineers, and prepare and conclude contracts with foreign countries following that.
- We support our customers with various procedures relating to international trade.
- We respond to our customers with optimal business plans that meet a diverse array of requirements.

■ Release paper and anti-mold agent

■ Release paper for synthetic leather “DN-TP®”

Release paper is a specially processed paper embossed with the look of natural leather or geometric and other patterns. Synthetic leather with a variety of designs can be manufactured by transferring the embossed patterns to the surface of polyurethane or vinyl chloride sheets. This type of synthetic leather is used in a wide variety of everyday products, including fashion items like shoes, bags and clothing, sports shoes with enhanced functionality, and large-sized items, such as furniture and car interiors.

“DN-TP®” is the world’s first non-silicon-type release paper developed by Dai Nippon Printing Co., Ltd. and we have served as general agents for that product. We have been selling to various countries all over the world, including Japan.

・ Process from release paper to product

[Ajinomoto Trading, Inc]

① Sale of release paper

[Synthetic leather manufacturer]

② Synthetic leather manufactured with release paper

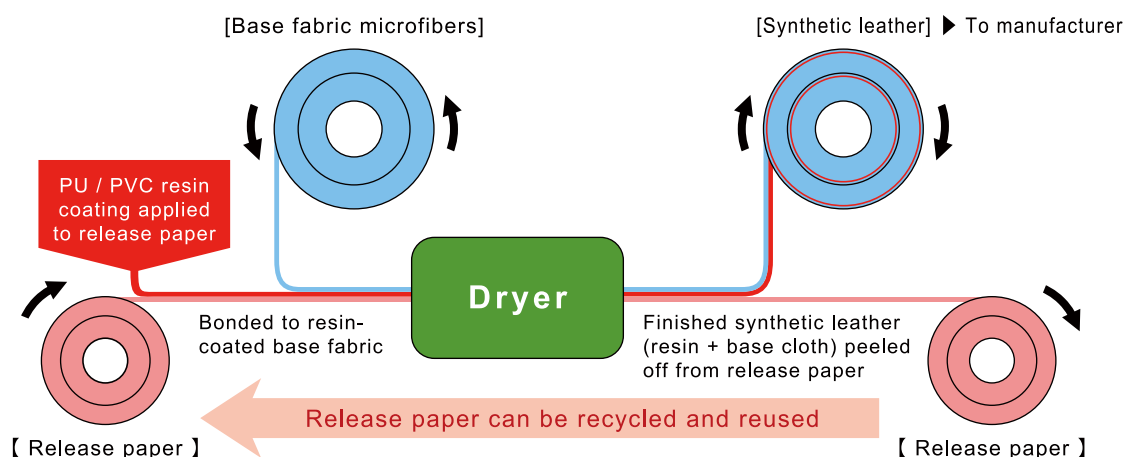

[Manufacturer]

③ Synthetic leather processed onto final product and sold

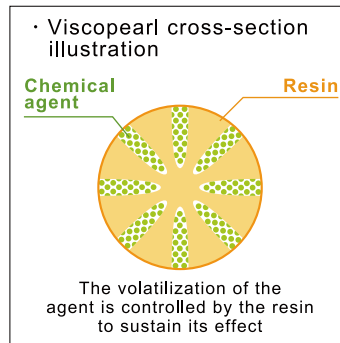

・ Example of how synthetic leather makers use release paper

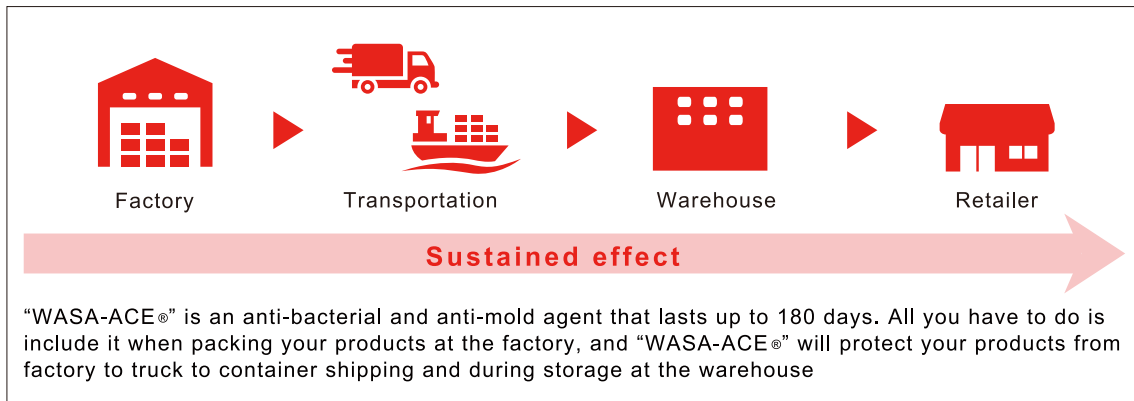

■ Release paper and anti-mold agent

■ Anti-mold agent “WASA-ACE®”

The main ingredient for anti-bacterial and anti-mold agent “WASA-ACE®” is allyl isothiocyanate, the natural compound that gives wasabi its sharp flavor. This product has made a major contribution to maintaining the quality of leather, bamboo, rattan, cloth, and other products during shipment and storage.

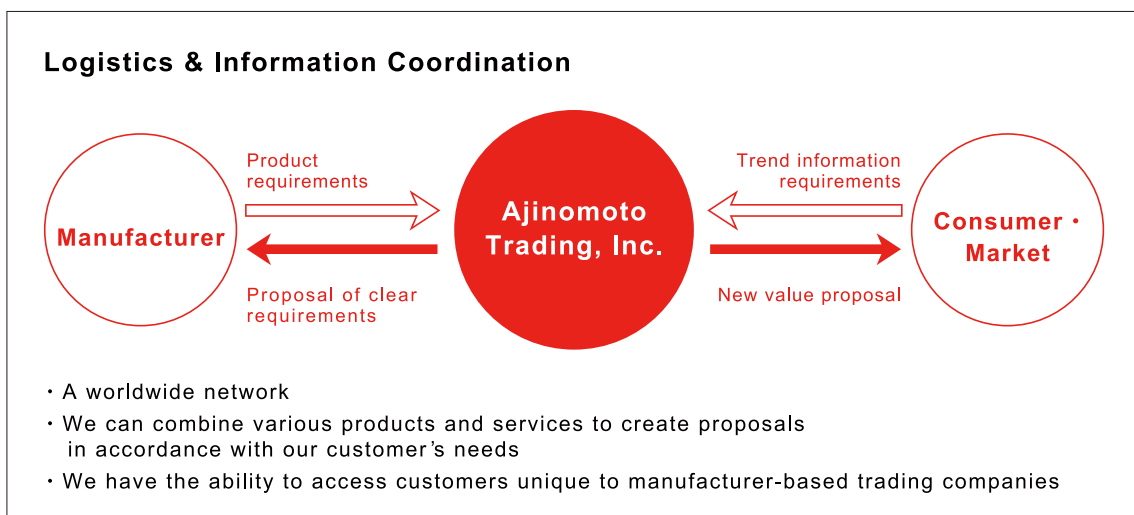

• “WASA-ACE®” in action

■ Why Choose Ajinomoto Trading, Inc.?

- In addition to developing conventional products, we also propose completely new usages and creation of value for said products.

■ Import / Export solutions

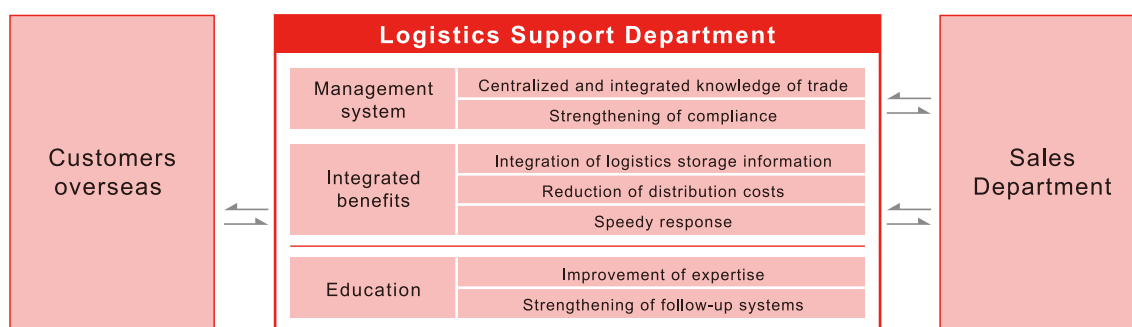

■ As a core trading company of the Ajinomoto Group

As a core trading company of the Ajinomoto Group, we provide our customers with a high added-value service. This includes reliable preparation of export documents created by an experienced expert group with abundant knowledge, establishing complex logistics structures that respond to multilateral trade or various risks, including supply and demand management, and import tariff reduction proposals for each country utilizing international economic partnerships and free trade agreements (EPA, FTA).

■ Reliable business practice operations

With over forty years of history as an export agency business in the Ajinomoto Group, we provide logistics operations coordinated by expert groups with abundant knowledge and experience relating to trade-related laws and general logistics and prepare export documents compatible with laws and regulations around the world to offer our customers safety and security when dealing with complex international logistics.

■ Trade scheme with high added value

We form high added-value trade schemes in response to the various risks involved in complex international transactions, such as a multilateral high-level logistics and delivery system including supply and demand management, international contracts and payment settlement, exchange risk hedging, and credit management that utilizes trade insurance. We also propose optimal transportation routes and methods that match the characteristics of products and raw materials, based on our experience in handling a wide range of products outside of the food industry, such as raw pharmaceutical materials, and chemical products and substances.

■ Safe and secure trade management structure

We have established a trade management system based on the AEO (Authorized Economic Operator) program, and a structure compliant with related laws and regulations based on a quality assurance system supported by the Ajinomoto Quality Assurance System "ASQUA."

■ About Ajitrade (Thailand) Co.,Ltd.

Ajitrade (Thailand) Co., Ltd. fulfills a function as a hub for the network connecting Thailand and its neighboring countries, provides a wide range of import and export business services. The company imports various seasonings, amino acids, spices for food processing, machinery and packaging materials from Japan, and exports food ingredients/processed products from Thailand to Japan. Utilizing the know-how of each company of the Ajinomoto Group, we can offer support in various areas related to food.

■ Products we deal with

We provide an import/export service involving “umami” seasonings, amino acids for foods/pharmaceutical, feed additives, food ingredients and spare machine parts, etc. We also develop spices and develop amino acid-based personal care.

■ About the Ajitrade Cosmetics Application Center (ACAC)

Ajitrade Cosmetics Application Center (ACAC): We provide laboratory services by utilizing amino acid based ingredients to develop or test personal care which can be used in hair care, skin care, color cosmetics, and toiletry applications. Our technical support team is always solving problems with our collective years of knowledge and experience. We provide a full range of services to meet your needs, from routine mechanical to analytical testing. We also find market trends that may lead you to your project's design. We can assist you with any technical question you may have.

■ Why Choose Ajitrade (Thailand) Co., LTD.?

- We import to and export from Japan in collaboration with Ajinomoto Trading.
- Utilizing the know-how of each company in the Ajinomoto Group, we support the development of processed food products and offer a cost reduction support service in Thailand.
- We offer a comprehensive import/export business service in which we provide seamless handling of every step of your transaction, from devising a plan, signing the contract, filling orders to making payments.
- We can work in three languages: English, Thai, and Japanese.

■ ประเทศไทยและอาเซียน

■ เกี่ยวกับบริษัท อายิเทรต (ประเทศไทย) จำกัด

บริษัท อายิเทรต (ประเทศไทย) จำกัด มีบทบาทในการเป็นศูนย์กลาง การเชื่อมโยงเครือข่ายระหว่างไทยกับกลุ่มประเทศเพื่อนบ้าน บริษัทฯ เป็นผู้ให้บริการเกี่ยวกับธุรกิจการนำเข้าและการส่งออก สินค้าหลักที่นำเข้ามีความหลากหลาย อาทิเช่น กลุ่มผลิตภัณฑ์เครื่องปรุงรส กรดอะมิโน และเครื่องเทศที่ใช้สำหรับการผลิต หรือ การแปรรูปอาหาร รวมไปถึงการนำเข้าเครื่องจักรและวัสดุบรรจุภัณฑ์จากประเทศญี่ปุ่น เรามีการส่งสินค้าออกในหมวดของ ส่วนผสมเครื่องปรุงรส สำหรับผลิตภัณฑ์อาหาร ผลิตภัณฑ์แปรรูปจากประเทศไทยไปยังประเทศญี่ปุ่น เราสามารถใช้ประโยชน์จากความรู้ ความเชี่ยวชาญของแต่ละบริษัทฯ ในกลุ่มบริษัทอายิโนะโมะโต๊ะ ทำให้เราสามารถนำเสนอการบริการ และการสนับสนุนต่างๆ ที่เกี่ยวข้องกับธุรกิจอาหารได้อย่างหลากหลาย

■ ผลิตภัณฑ์ที่ให้บริการกับท่าน

เรามีให้บริการการนำเข้า/การส่งออก ที่เกี่ยวข้องกับเครื่องปรุงรส "อูมามิ", กรดอะมิโนสำหรับอาหาร, ผลิตภัณฑ์ยา, อาหารสัตว์, ส่วนผสมเครื่องปรุงอาหาร และชิ้นส่วนอะไหล่ของเครื่องจักร เป็นต้น นอกจากนี้ เรายังมีการคิดค้น พัฒนา และทำตลาดในส่วนของกลุ่มผลิตภัณฑ์เครื่องเทศ และผลิตภัณฑ์ดูแลส่วนบุคคลที่มีส่วนประกอบพัฒนามาจาก กรดอะมิโน

■ ศูนย์วิจัยและพัฒนาเครื่องสำอางค์อายิเทรต (ACAC)

ศูนย์วิจัยและพัฒนาเครื่องสำอางค์อายิเทรต(ACAC): ให้บริการทางห้องปฏิบัติการ โดยการใช้ส่วนผสมจากกรดอะมิโน เพื่อการพัฒนาหรือทดสอบ ผลิตภัณฑ์ที่ใช้ดูแลส่วนบุคคล ซึ่งสามารถใช้ดูแลเส้นผม การดูแลผิวพรรณ เครื่องสำอางค์และผลิตภัณฑ์สำหรับการอาบน้ำ เรามีทีมสนับสนุนทางเทคนิค ที่มีความรู้และประสบการณ์นานนับปี พร้อมให้บริการ หรือการแก้ปัญหาให้อย่างเต็มความรู้ความสามารถ เราพร้อมที่จะให้บริการแบบครบวงจรเพื่อตอบสนองความต้องการของคุณ ไม่ว่าจะเป็นกระบวนการในการทดลอง ตลอดจนไปถึงการวิเคราะห์ผลต่างๆ นอกจากนี้ เรายังให้บริการ ในการหาแนวโน้มของตลาดที่อาจนำคุณไปสู่การพัฒนาหรือการออกแบบโครงการต่างๆในอนาคต เราสามารถช่วยคุณได้ทุกคำถามทางเทคนิคที่คุณอาจจะมีความต้องการ

■ ทำไมต้องเลือกเรา บริษัท อายิเทรต (ประเทศไทย) จำกัด?

- เราให้บริการทั้งการนำเข้าและการส่งออกไปประเทศญี่ปุ่น โดยทำงานร่วมกับบริษัท อายิโนะโมะโต๊ะ เทตรัตติง ประเทศญี่ปุ่น
- เราสามารถนำความรู้ความชำนาญเฉพาะทางของแต่ละบริษัทของกลุ่มอายิโนะโมะโต๊ะ มาใช้เพื่อช่วยสนับสนุนการพัฒนาผลิตภัณฑ์ อาหารแปรรูป และนำเสนอเพื่อช่วยให้เกิดการลดต้นทุนการผลิตในประเทศไทย
- เราแนะนำธุรกิจการให้บริการนำเข้า/ส่งออกแบบครบวงจร ซึ่งเราสามารถจัดการทุกขั้นตอน ของการดำเนินงานให้คุณได้อย่างราบรื่น จากการวางแผนการทำงาน จัดทำร่างสัญญา รวมไปถึงการลงข้อมูลในเอกสารต่างๆเพื่อทำการชำระหนี้
- เราสามารถทำงานได้โดยใช้ 3 ภาษา ได้แก่ ภาษาอังกฤษ ภาษาไทย และ ภาษาญี่ปุ่น
