

**Product Information: Recombinant Human KGF (FGF-7), 50µg**

**1. Introduction**

Keratinocyte Growth Factor (KGF) is one of 23 known members of the FGF family, and it is known as FGF-7. Proteins of this family play a central role during prenatal development, postnatal growth, and the regeneration of a variety of tissues, by promoting cellular proliferation and differentiation. KGF is a mitogen factor specific for epithelial cells and keratinocytes. Recombinant Human KGF is an 18.9 kDa protein consisting of 163 amino acid residues.

**2. Materials Provided**

Component	Volume	Storage
Recombinant Human KGF (FGF-7), 50µg (0.1 mg/ml)	500 µl	Store at -80°C

**3. Preparation for Use**

Recombinant Human KGF (FGF-7) is provided frozen and can be stored at -80°C until use. Before use, this frozen product should be thawed on ice. Avoid repeated freeze-thaw cycles.

**4. Precaution and Disclaimer**

Recombinant Human KGF (FGF-7) is for research use only and is not for diagnostic use, therapeutic use (including clinical research), or as a food. KGF is dissolved in DPBS(-) containing 1.5 mM DTT and 100 mM Na<sub>2</sub>SO<sub>4</sub> (0.2 µm filtered).
